

THE REGIONAL SCIENCE ASSOCIATION INTERNATIONAL

The Regional Science Association International (RSAI) is an interdisciplinary, international organisation focusing on understanding the growth and development of urban, regional and international systems. This is promoted through meetings and publications, developing appropriate concepts and methods of analysis, and through the discussion of regional problems and policies. The Australia and New Zealand Section (ANZRSAI) is the local 'branch' of the international body. The broad membership of the ANZRSAI Inc., together with its international affiliation with over 35 countries, provides an Australia – New Zealand perspective within a global regional development context.

The ANZRSAI's goals are:

- To disseminate knowledge relevant to regional issues and process.
- To encourage research and analysis in fields relevant to regional policy and process.
- To provide forums for the discussion of research, planning and process.
- To encourage and facilitate the professional development of those involved in regional economic and social research, policy and practice.
- To develop policies in liaison with relevant agencies with respect to regional analysis and process.
- To raise community awareness of regional economic and social policy and practice.

Through its annual conference, meetings and publications, the ANZRSAI Inc. encourages members to participate in discussions in order to achieve greater recognition of the need for regional development policy and practice, and to ensure that appropriate structures are pursued within regions in support of regional development based upon analysis and appropriate planning. It is committed to ensuring that Australian regional development process is of a quality that is recognised worldwide.

The ANZRSAI membership encompasses people from many disciplines, including economists, geographers, planners, educators, engineers and consultants, and from many fields of activity; government, universities, research and planning establishments and the private sector. A major strength of the Association lies in the interaction of these various perspectives.

Membership is open to any individual or institution with an interest in regional issues. Annual membership subscription for individuals is \$160 (Student \$30.00, Emeritus subscription \$60.00). Institutional Membership is \$337.50 pa. Members receive the academic journal published three times yearly by the ANZRSAI; the *Australasian Journal of Regional Studies*. They also receive the ANZRSAI Newsletter and are offered a discount registration fee for our annual conference. For membership enquiries and/or further information, contact:

The Executive Secretary, ANZRSAI Inc., via our website at www.anzrsai.org.

THE AUSTRALASIAN JOURNAL OF REGIONAL STUDIES

Notes for Contributors

The *Australasian Journal of Regional Studies* (AJRS) is a refereed journal published by the Australia and New Zealand Regional Science Association International Inc. This non-profit organisation is dedicated to improving our understanding of regional economic and social conditions and development processes in both the Australasian region and the world at large through research and the discussion of ideas. We welcome contributed articles falling within the broad disciplinary scope of economics, geography, urban and regional planning, demography, environmental resource management, and related public policy.

Articles may be theoretical, philosophical, or empirical in spirit. For example, AJRS regularly publishes (a) cutting edge theoretical and empirical articles on the processes shaping regional economies; (b) analyses of current and emerging regional economic and social conditions often employing innovative data sets and statistical techniques; (c) analyses of short to medium term prognoses for regional development resulting from globalisation, changing macro- and micro-economic settings, or emergent technologies – among other things, and (d) penetrating conceptual, philosophical or ideological articles on the capacities of various tiers of government or communities to develop strategies to remedy or ameliorate regional problems identified through (a) to (c).

Manuscripts should be sent electronically to both:

Dr Sonya Glavac (sglavac@une.edu.au)

Professor Tony Sorensen (Tony.Sorensen@une.edu.au)

Their postal address is Division of Geography and Planning, School of Behavioural, Cognitive and Social Science, University of New England, Armidale, NSW 2351, Australia.

Articles of up to about 6,000 words in length should be double spaced in 12 pt Times (New Roman) font, have ample margins, and employ the following structure and / or format:

- (1) A cover page with the title of the paper; authors' names, postal and email addresses; and organisational affiliation. If there is more than one author, please specify the corresponding author to whom acknowledgement, queries or reports should be sent. Referees will not receive this page.
- (2) Page two must be headed by the article's title and an abstract of between 100-150 words. The latter will be self-contained and not use undefined abbreviations or references. After the abstract, please provide (i) not more than 5 key words, and (ii) any acknowledgements of, for example, research grants on which the article depends. Authors' names should not appear (the refereeing process is double-blind). The article's text immediately follows these preliminaries.
- (3) The text should employ a system of major headings and sub-headings each on a separate line. Please use Title Case for major headings, which will be in bold 12pt font and numbered using Arabic numerals. Sub-headings will also be in bolded Title Case, but italicised and not numbered.

- (4) Tables and figures must be supplied on separate sheets and not be integrated into the main text. They can be attached to the end of the text or submitted as a separate document. All tables and figures should be mentioned in the text and numbered using Arabic numerals. Captions and legends should be grouped together in a list. Figures and line drawings should be of a quality suitable for printing and will not normally be redrawn by the publisher. Since the journal is published electronically, we can, however, accept colour figures. Please make sure that sources are given for tables and figures.
- (5) Footnotes should be avoided if possible.
- (6) Textual references should give the author's name, with year of publication in parentheses. Multiple publications by the same author in the same year should have (a), (b), etc. appended. Full references will be listed in alphabetical order at the end of the text using the following formats:

Evans, A.W. (1990), The assumption of equilibrium in the analysis of migration and interregional differences: a review of some recent research, *Journal of Regional Science*, 30(4), pp. 515-532.

Jensen, R.C., Mandeville, T.D. and Karunaratne, N.D. (1979), *Regional Economic Planning*, Croom Helm, London.

Putman, S.H. (1990), Equilibrium solutions and dynamics of integrated urban models, In L. Anselin and M. Madden (eds), *New Directions in Regional Analysis*, Belhaven, London.

Please do not abbreviate the titles of journals.

Proofs will be sent to authors (if there is sufficient time to do so). They should be corrected and returned to the publisher as soon as possible (within three days).
